## Chapter 1 - System Information

### 1.1 About this manual

This User's Guide provides detailed programming instructions. Barcode scanners are factory programmed for the most common communication setting. If you need to change these settings, programming is accomplished by scanning the bar codes in this guide.

### 1.2 How to set up the parameter -I

- (1) Scan Start Configuration
- (2) Scan all necessary labels for parameters that meet your applications.
- (3) Scan End Configuration to end the programming.

Start configuration

End configuration

Standard Product Defaults Setting

Check Version

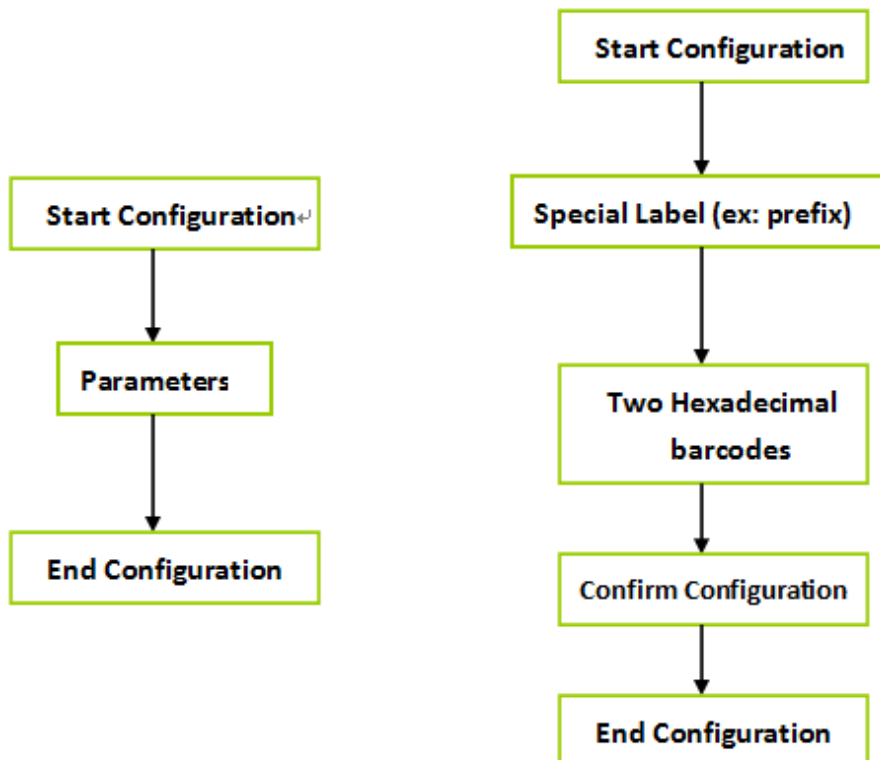

An asterisk (\*) next to an option indicate the default setting.

### 1.3 How to set up the parameter - II

Most of time the scanner only requests one read of parameters when changing to new values. You will hear two beeps when you successfully set to the new values. But for some special parameters, multiple reads are needed to complete the configuration. When use these special parameters. In some cases, you might need to read one or more barcodes, such as:

- ◆ Hexadecimal barcodes. For example: prefix, suffix, etc.
- ◆ Numeric barcodes. For example: inter-character delay, max/min length

To complete the change of setting you will need to read the “Confirm” barcode after you read the parameter. Below is the flow chart to explain two different configurations.

## Chapter 2 - System setup

### 2.1 Interface selection

The scanner is designed to switch easily from interfaces.

Remember to reset the interface before changing to PS/2 or RS232 cable.

No presetting is requested for USB interface. Scanning USB bar code after the cable is changed and activating the scanner by plugging the USB cable again. USB interface complies with HID keyboard which means the setting of USB scanner is exactly the same like the default setting from keyboard.

Start configuration

End configuration

ITEM	OPTION
	 KEYBOARD
	 RS-232
Interface Selection	 * USB
	 USB Virtual COM

### 2.1.1 Keyboard emulation parameters setting

Start configuration

End configuration

ITEM	OPTION
	 *IBM AT
	 IBM XT
	 IBM PS/2 30-80
Device Selection for keyboard Interface	 IBM 5550
	 PS/2 25 , 30
	 NEC 9801
	 Reserved 1
	 Reserved 2

Start configuration

End configuration

ITEM	OPTION
	 * USA
	 ITALIAN
	 SPANISH
Language for Keyboard Interface	 FRENCH
	 GERMAN
	 JAPANESE
	 Multi-Language Support
	 Reserved 1

Start configuration

End configuration

ITEM	OPTION
Function Key	
	* Disable
	Enable
Emulate External Keyboard	
	* Disable
	Enable
ALT Mode	
	* Disable
	Enable

NOTE : Emulate External Keyboard

Scan the barcode below if you do not have an external keyboard.

After scanning the Emulate External Keyboard bar code, you must power cycle your computer.

Start configuration

End configuration

ITEM	OPTION
Caps Lock	 * Disable
	 Enable
Num Lock	 * Disable
	 Enable
Inter Character Delay (Default : 00)	 Ref: Appendix ( 00—64H )

Start configuration

End configuration

ITEM	OPTION
Terminator

	 ACK/NAK
	 Xon/Xoff

## 2.2 Scanning mode selection

Start configuration

End configuration

ITEM	OPTION
Reading Mode	
	* Trigger On/Good Read Off
	Trigger On/Off
	Continuous/Trigger Off
	Presentation Mode (only linear imager supported)
Continuous/Trigger on	
Continuous /Auto power on	
Flash	
Flash / Auto Power On	

### 2.3 Beeper tone selection

Start configuration

End configuration

ITEM	OPTION
Beep Tone (Default : 09H)	 Ref: Appendix (00-10H)
Beep Sound Duration (Default : 05H)	 Ref: Appendix (00-10H)
Power On Beeper	 * Enable
	 Disable
Beeper	 * ON
	 OFF

## 2.4 String Options (Prefix & Suffix)

This section describes the alterations which can be made to the format of the transmitted data string. A prefix and suffix of maximum 10 direct input may be included in front and at the end of scanned barcode.

### **Format**

{Prefix} {Code ID} {Bar Code} {Suffix}

### **How to set up a prefix?**

To configure “##” as prefix

- (1) Scan Start Configuration barcode
- (2) Scan Preamble bar code
- (3) Scan “#” twice from FULL ASCII table
- (4) Scan Confirm configuration barcode
- (5) Scan End Configuration barcode.

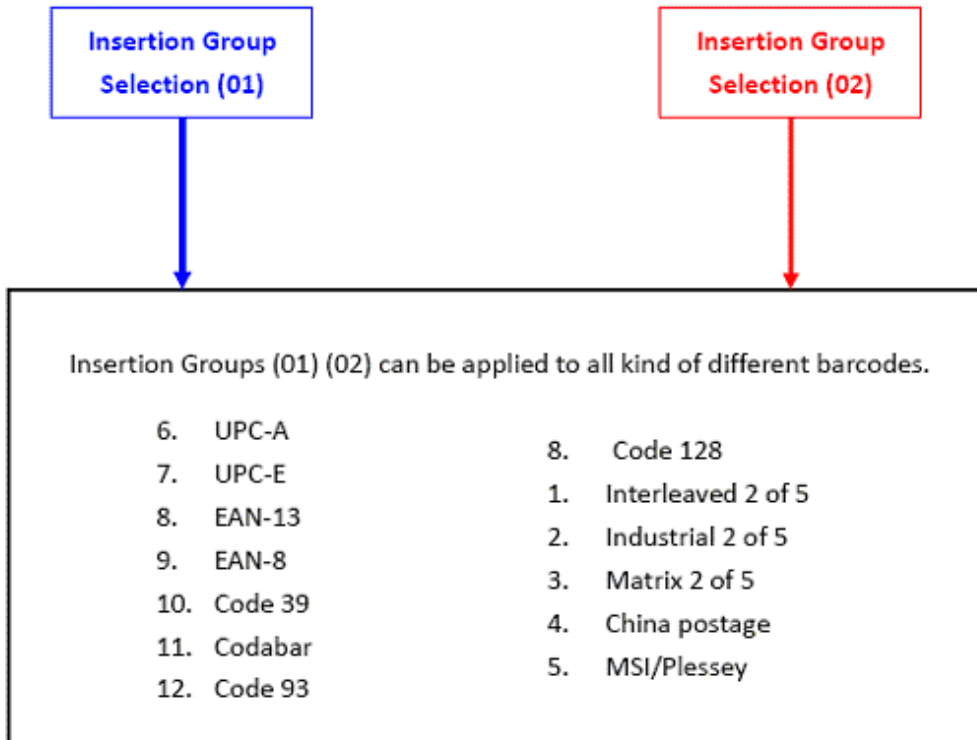

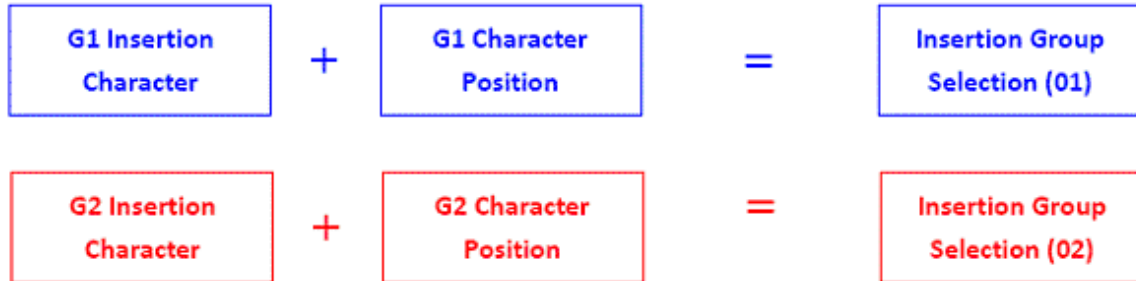

### **How to set up a suffix?**

To configure “\$\$” as suffix

- (1) Start configuration barcode
- (2) Scan Postamble barcode
- (3) Scan “\$” twice from FULL ASCII table
- (4) Scan Confirm configuration barcode
- (5) Scan End configuration barcode.

## 2.5 Setup Insertion

This section describes how to setup the insertion of output.

### NOTE :

- ◆ Max. 10 charters can be inserted each time
- ◆ Max. Insertion group is only two.
- ◆ Insertion group (01) or (02) can be used in different kinds of barcodes at the same time

**Example:**

:

To insert character "A" before the third digit(3)

Make the decoded data: 12A3456789

**How to set up a character you want to insert**

- (1) Scan Start Configuration barcode
- (2) Scan "G1 Insertion character"
- (3) Scan "4" and "1" from FULL ASCII Table
- (4) Scan Confirm configuration barcode
- (5) Scan End configuration barcode

**How to set up position you wish to place the character**

- (6) Scan Start Configuration barcode
- (7) Scan "G1 Character Position"
- (8) Scan "0" and "3" from FULL ASCII Table (which presents the position)
- (9) Scan Confirm configuration barcode
- (10) Scan End configuration barcode

**How to set up insertion for code 39**

Go to chapter 3.5 (code 39)

- (11) Scan Start Configuration barcode
- (12) Scan "Insert group selection" bar code
- (13) scan "0" and "1" from FULL ASCII Table  
(which presents the group- 01 you just set up previously)
- (14) Scan Confirm configuration bar code
- (15) Scan End configuration barcode

Start configuration

End configuration

Confirm configuration

ITEM	OPTION
Preamble (Default : 00)	 Ref: Appendix
Postamble (Default : 00)	 Ref: Appendix
G1 Insertion character (Default : 00)	 Ref: Appendix
G2 Insertion character (Default : 00)	 Ref: Appendix
G1 Character Position to be inserted (Default : 00)	 Ref: Appendix
G2 Character Position to be inserted (Default : 00)	 Ref: Appendix

Start configuration

End configuration

ITEM	OPTION
Bar Code ID	 *Disable
	 Enable
Accuracy	 * Read 1 Time
	 Read 2 Time
	 Read 3 Time
Reading	 Bar equals high
	 Bar equals low

Code Type	ID	Code Type	ID

Code 93	L	Code 11	T
Code 128	M	Telepen	V

## Chapter 3 - BarCode parameters setting

### How to set up a Code ID?

- (1) Scan Start configuration bar code
- (2) Go to the ASCII Table and scan label that represent the desired characters to be inserted.
- (3) Scan Confirm configuration bar code
- (4) Scan End configuration bar code.

Start configuration

End configuration

Confirm configuration

### 3.1 UPC-A

ITEM	OPTION
