ELCOM®

Robust and waterproof construction with protection class IP65 safely resists dust, shocks and immersion in water

Closed construction without fans and moving parts guarantees completely silent and comfortable operation

19" scratch-resistant display is visible at all times with the ANTI-GLARE matte finish and can be operated with all ten fingers, even in gloves

Built-in microphone, camera and speakers ensure easy and efficient communication even under the most demanding conditions

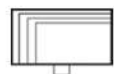

Wide range of mounting possibilities: on a desk, wall, using a Tube Holder or VESA standard guarantee a great fit into any type of establishment
