Robust and waterproof construction with protection class IP65 safely resists dust, shocks and immersion in water

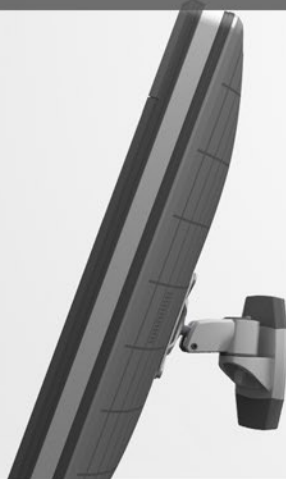

Closed construction without fans and moving parts guarantees completely silent and comfortable operation

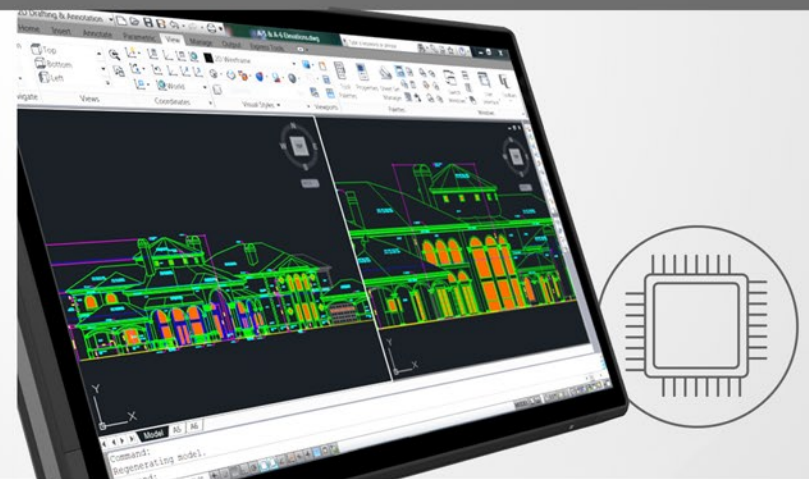

19" scratch-resistant display is visible at all times with matte finish and can be operated with all ten fingers, even in gloves

Built-in speakers ensure easy and efficient communication even under the most demanding conditions

Wide range of mounting possibilities: on a desk, wall, using a Tube Holder or VESA standard guarantee a great fit into any type of establishment

Processors in 3 versions provide smooth running of current and future applications: Quad-Core J1900, i5 7300U Seventh Generation
